

Quality Enhancement Plan (QEP): Preserving Our 3Cs: Character, Community, and Culture.

CSC 291 – Introduction to Python Programming

Instructors: Dr. Joseph Aneke

Office: Science & Technology 120

Telephone: 757-728-6406

E-Mail: joseph.aneke@hamptonu.edu; josephogo.aneke@gmail.com

Office Hours: Monday, Wednesday, Friday - 10 am – 1.30 pm. (Please make an appointment)

Others by appointment.

Course Information: CSC-291-01-S23 Introduction to Python Programming (CRN 24703)

Class Schedule: Mondays, Wednesdays, and Fridays 9:00 am – 9:50 am

Applied Course Description

This course will introduce students who already understand the fundamental core concepts of programming to the Python programming language. Students will be introduced to data types, control structures, functions, parameter passing, library functions, arrays, inheritance, and object-oriented design. Students will solve problems, explore real-world software development challenges, and create practical and contemporary applications using machine learning. In addition to programming fundamentals, students will gain early exposure to concepts of computational efficiency, scalability, and high-performance computing (HPC). They will also participate on hands-on projects, labs and enrichment activities, students will explore resources e.g Data sets with a view to produce reproducible projects and how supercomputing resources are applied to solve real-world problems.

Prerequisite: CSC152 with a grade of “C” or better.

Course Material(s)

All the required course materials for your classes are being delivered through Follett, the Hampton University Campus-Wide course materials program. All charges for the course materials that are required for your classes this semester will be automatically billed to your student account.

Digital Material(s)

Students will be using a digital e-book through BryteWave/Redshelf. An email will be sent directly from BryteWave donotreply@redshelf.com to students, with a link to their account. Students should follow the directions in the email to access their shelves. Accessing the e-books for the first time will provide a screen where students can click to “View Course Materials.”

***** Attention: You must pass CSC 291 with a grade of "C" or better in order to satisfy degree requirements *****

Physical Material(s)

For courses using a physical (print) book, students will receive an email confirming that their materials are ready for pickup. Upon receipt, students should bring their Student ID to the online order pickup area at the campus bookstore to pick up print course materials.

Note: If students drop a course on or before the last day of the DROP/ADD period, they must return the physical course material to the campus bookstore before their student account can be fully refunded.

If students have any questions about the Follett e-Book program, please contact the Collegiate Bookstore at 757-727-5446.

	Required Starting with Python, Fifth Edition
--	--

Required Software

The following softwares are required to understand and complete the Python course.

- **Google Collab**
- **Python software**
- **Gen AI tools (only when approved by the tutor)**
- **Jetstream2 Documentation, ACCESS.**
- **Cornell Virtual Workshop, Cornell Center for Advanced Computing.**
- **HPC Carpentry, introductory HPC teaching materials**

Disclaimer

This syllabus is intended to give the student guidance in what may be covered during the semester and will be followed as closely as possible. However, the professor reserves the right to modify, supplement, and make changes as the course needs arise.

Course Objectives

General Instructional Objects/Course Objectives

At the conclusion of this course, the students are able to:

1. Understand the fundamental programming concepts of Python
2. Understand the fundamental concepts of object-oriented programming implemented in Python
3. Understand how Python represents and manipulate Advance Data Structures

Specific Intended Student Learning Outcomes

At the conclusion of this course, the students are able to perform the following based on the above general objectives:

Objective#	Outcomes
#1	• Design and incorporate different programming control structures into a simple Python program • Incorporate appropriate APIs and Libraries into simple Python programs • Determine the output for given inputs for different Python programs • Design, debug, and test simple Python programs • Intro to Programming with HPC Perspectives
#2	• Design Python programs that utilize lists, tuples, and dictionaries • Design decision structures using dictionaries • Design object-oriented programs with Python classes. • Use class inheritance in Python for reusability. • Use exception handling in Python applications for error handling. • Process and analyze an authentic large dataset using shared cyberinfrastructure
#3	• Design Python programs that link lists, queues, stacks, and/or trees • Identify the main difference in how link lists, queues, stacks, and/or trees are represented • Execute and compare Python programs in local and Jetstream2 computing environments. • Critically evaluate GenAI-generated debugging suggestions for correctness and efficiency. • Compare execution behavior to determine when additional computing resources are beneficial. • Document and publish a reproducible Python workflow through GitHub.

Accrediting Body Standards and Objectives

ABET Computing Accreditation Commission

At the conclusion of the course, students will be expected to have accrued the following competencies:

Competencies	Measurable Outcomes	Evaluative Measurements
--------------	---------------------	-------------------------

*** Attention: You must pass CSC291 with a grade of "C" or better in order to satisfy degree requirements ***

1. Apply critical thinking and problem-solving skills, which will enable them to define and solve a wide variety of programming problems.	1. The student can design, debug, and test Python programs.	1. Project, Examinations, Assignments
2. Apply mathematical foundations and computer science theory in the modeling and design of programming solutions.	2. The student can design different data structures that solve math-related problems.	2. Project, Assignments, Examinations
3. Plan and participate in a team project, designing and implementing a working solution to a specific problem.	3. The student can design, debug, and test a Python solution to a given real-world problem.	3. Project

ABET CAC Student Outcomes (Revised Fall 2021)

The following are student outcomes that will be met by this course

Student Outcome(s)	Assessment Method(s)	Description
1: Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions	Examinations	Tests, Exams, Quizzes
4: Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.	Writing Assignments	Ethics Paper
6: Apply computer science theory and software development fundamentals to produce computing-based solutions. [CS]	Examinations	Tests, Exams, Quizzes

Hampton University Core Competencies

The following are the HU Core Competencies that will be met by this course

1. **Critical Thinking** is the ability to identify how to act after careful evaluation of the evidence and reasoning presented in a communication. (**Measurement:** Examinations, Assignments, Project, Ethics Paper).
2. **Ethics** is the ability to identify ethical ideas, issues, and apply ethical principles relating to personal, professional, and academic conduct. (**Measurement:** Ethics Paper).
4. **Information and Technology Literacy** is the ability to use electronic media to support research activities and the ability to locate, evaluate, and use the needed information and its sources effectively. (**Measurement:** Project, Assignments, Ethics Paper).
5. **Oral Communication** is the ability to deliver a spoken message of depth and complexity in a way that elicits a response from an audience of understanding, appreciation, assent, or critical inquiry. (**Measurement:** Project).
6. **Quantitative Reasoning** is the ability to use numerical, geometric, and measurement data and concepts, mathematical skills, and principles of mathematical reasoning to draw logical conclusions

***** Attention: You must pass CSC291 with a grade of "C" or better in order to satisfy degree requirements *****

and to make well-reasoned decisions in professional, financial, and/or real-world situations. (**Measurement:** Examinations, Assignments, Project).

7. **Scientific Reasoning** is the ability to describe, understand, predict, and control natural phenomena by adherence to a self-correcting system of inquiry, the scientific method, and reliance on empirical evidence. (**Measurement:** Assignments, Project).
8. **Written Communication** is the ability to develop and express complex ideas clearly, coherently, and logically in a style appropriate for both purpose and audience and demonstrate mastery of accepted standards of written communication. (**Measurement:** Examinations, Assignments, Ethics Paper).

Minimum Course Competencies

Students meeting minimum competencies should expect to receive a grade between 74% and 77%.

Minimum competencies for this course are as follows:

- Implement basic programming functionality in the Python programming language (**Measurement:** Examinations)
- Identify and properly use Python modules/libraries as part of a larger program (**Measurement:** Assignments, Projects)

Disclaimer: Minimum competencies are not directly associated with your final grade in this course. Successful accomplishment of the minimum competencies will demonstrate your basic knowledge of the selected Specific intended Student Learning Outcomes.

Grading Policy

Students may be assessed through assignments as well as examinations that are designed to demonstrate the student's understanding of each concept. No assignment will be handed out in class. Everything will be available online. These assessments may vary depending on the instructor.

Attendance	5%
Discussion- class-participation	5%
Ethics Paper	5%
Assignment	15%
Project	35%
Exams (tests, quizzes, and final)	35%

Attendance 5%

Students will be graded based on attendance in class.

Discussion-participation 5%

Students will be graded based on their in-class participation. This may also include quizzes, on-the-spot presentations, etc.

Ethics Paper 5%

There is a 6-week-long paper, which will serve to meet the WAC curriculum. This will allow students to analyze research conducted in computer ethics.

Assignment 15%

Students will complete lab exercises: problems and programs. Both of them will be issued and specified with their due date in Canvas. Problems will be used to evaluate the understanding of

***** Attention: You must pass CSC291 with a grade of "C" or better in order to satisfy degree requirements *****

course materials, and programs will be used to evaluate students' understanding of Python programming.

Project 35%

Students will complete 3 mini projects that seek to test their knowledge on different concepts as used and represented in Python. Students will be expected to design and implement a solution based on real-world problem(s).

Exams 35%

The exams are designed to test students' knowledge and understanding. All exams will be closed-book and closed notes.

- (i) Tests: **(25%)** There will be at least 3 tests given on the capstone sections. They will serve as benchmarks of a student's ability to relatively quickly solve problems related to the material up to that point.
- (ii) Midterm: **(10%)** There will be one midterm exam, which will serve as a benchmark of a student's understanding of the course concepts for the first half of the semester.
- (iii) Final Exam: **(25%)** This is a comprehensive examination covering the entire course. The date and time are scheduled by the Registrar and cannot be changed. **All students and faculty will adhere to the final exam schedule set by Hampton University.** There are no exemptions for the exam. There are no exemptions for the exam. The scheduled date and time for this examination will be:

TBD

Midterm grade

This will be calculated from the Midterm and all graded assignments. The date for Mid Term will be TBD

Questions about Grades

Questions about the grade assigned for quizzes, assignments, and exams must be resolved within one week after the graded work is returned.

The University Grading System

A+	97-100	B+	87-89	C+	77-79	D+	67-69	F	Below 60
A	93-96	B	83-86	C	73-76	D	63-66		
A-	90-92	B-	80-82	C-	70-72	D-	60-62		

Computer Science Grades

If a student is majoring or minoring in CSC, CYS, or CIS, he/she is **required to earn at least a grade of "C" or better** to satisfy degree requirements.

School of Science Grades

In addition to the minimum grade requirements established by Hampton University, all majors within the School of Science must pass all required courses offered within the School of Science with a grade of "C" or better to satisfy degree requirements. The minimum grade requirement is in effect for all science courses taken during Fall 2001 and beyond.

Incomplete Grade Policy

Please note that a student will not automatically receive an "I" on their final grade due to missing work and/or assessments (even with an acceptable excuse). An "I" will be considered **ONLY** if you have a

***** Attention: You must pass CSC291 with a grade of "C" or better in order to satisfy degree requirements *****

passing average by the end of the semester, AND a verifiable emergency situation such as military deployment (it must be BOTH, not either or).

Once granted a grade of “I,” it is the student’s responsibility to arrange for the completion of the work in consultation with the instructor for the course within a year as an undergraduate student. Failure to do so will result in an automatic “F” for the course.

Writing-Across-The-Curriculum

Although the writing requirement will be achieved throughout the course in different assignment there will be one major WAC assignment, which focuses on ethics in the field of Computer Architecture. There will be two deliverables - a draft and the actual paper. Both will be submitted to Canvas and will be counted toward students’ WAC points. The paper should be presented in the APA format and should include a body of analysis and a bibliography in a proper, consistent format. It can also include appendices. The paper will be submitted to SafeAssign on Canvas and MUST NOT show more than 25% matching.

Expectations of Students

Student Responsibility

Students are expected to be punctual, alert, and prepared for class. Habitual tardiness is disruptive and will not be tolerated. Students must adhere to the Hampton University dress code and must display respect for both their classmates and their instructor.

Student Participation

They are expected to be an active participant in the course. Even though students may not physically see their classmates and instructor, the course is designed to include discussion and other forms of collaboration and communication. Students should be willing and ready to regularly communicate with classmates and instructors online. They should participate in weekly activities in the course and are expected to complete all assignments, tests, and any other activities by the due date.

Student Communication

Students are strongly encouraged to contact the instructor with course-related questions regarding course concepts, assignments, and feedback provided to them. It is recommended that they contact the instructor using their Hampton email well in advance of the due date. Emails will be answered within the next 2 school days. **There will be no communication on the weekends.**

The instructor has also set aside specific office hours to be available for phone conferences or chat sessions if students need additional course-related support.

Student Responsibility with Canvas

It is the student’s responsibility to read all emails and browse the course Canvas site daily for announcements and assignments. It is also the responsibility of the student to make sure that their e-mail and Canvas accounts remain active and do not allow the e-mail inbox to extend beyond storage capacity so that messages start bouncing back to the sender. If a student has problems or needs assistance with either e-mail or Canvas, contact the ATM at 757-728-6406.

Electronic Devices

The use of electronic devices, including cell phones, iPads, and tablets, is strictly prohibited during class time. Students should not be texting, using social media, browsing the Internet, or engaging in

any other off-task activity. Cell phones must be on vibrate or silent during class. If a student must take a call, he/she should excuse himself/herself BEFORE doing so. Students in violation of this policy will be asked to leave the classroom.

Email

The students are expected to check their **Hampton's email address** for any communication that requires the use of an email. If a student desires, they can have their Hampton's email address forwarded to their preferred email address.

Accommodations for 504 Compliance

Students with disabilities who require accommodations should (1) register with the Office of Testing Services and 504 Compliance to provide documentation and (2) bring the necessary information indicating the need for accommodation and what type of accommodation is needed. This should be done during the first week of classes or as soon as the student receives the information. If the instructor is not notified on time, retroactive accommodations may not be provided.

Students are expected to attend all (face-to-face and/or virtual) classes and to arrive on time. Unless circumstances prohibit, attendance will be taken in the first 5 minutes of class. **Anyone missing more than 10 hours of class time will receive an automatic "F" for the course** (classes that meet once a week = 4 or more classes; classes that meet twice a week = 7 or more classes; classes that meet 3 times a week = 10 or more classes). Students should be punctual; being late more than 5 minutes will count against their grade. Fifteen minutes or more will be considered an unexcused absence. Students are expected to stay in class for the entire class period. Those who leave early without prior approval will be removed from the attendance sheet, and points will be deducted from their grade.

*****NOTE: Students should let their instructor know, with as much advance notice as possible, if they will be late or need to leave early *****

Hampton University's attendance policy will be enforced and is as follows:

Faculty members have the right to establish attendance requirements in each of their courses. Instructors are responsible for clearly informing the students of the course syllabus at the beginning of the semester, of the attendance requirements, and the consequences of poor attendance.

Regulations Governing Class Absences

1. **Students who are absent from classes, regardless of the reasons, are responsible for completing all class assignments.** The student shall be responsible for arranging make-up work with the instructor, who shall be the sole judge of the satisfactory completion of the course.
2. **Students will not be allowed to make up or complete work that is missed as a result of suspension or dismissal from the university. Suspension or dismissal before the end of the semester involves the loss of academic credit for the entire semester.**
3. Any student who is ill should notify his/ her instructors that he/she will not be attending classes because of illness. If a student is ill, confined to quarters, or in a hospital, a statement from the Director of Student Health Services or a private physician shall be cause to support the student's explanation of absence. Any student missing a class because of clinic or Student Health Center treatment will receive a form showing the period of absence. This form shall be presented to each instructor whose classes have been missed. (Documentation verifying illness

***** Attention: You must pass CSC291 with a grade of "C" or better in order to satisfy degree requirements *****

MUST be obtained from the Student Health Center or your private physician and is NOT an automatic excuse for absence.)

4. It is the responsibility of a student planning a prearranged absence for personal or school purposes to notify his/her instructors at least 24 hours before the absence. Absences for school purposes may be verified by the staff or faculty member responsible for the activity.
5. A student having to be absent because of a death or serious illness in the family should report the situation to the Offices of the DOJAH/DORL. The appropriate Dean will notify the student's instructors that supportive documentation has been received and verified for the necessary absence. Residential students should inform their Residence Hall Director of the circumstances before leaving the campus.

Also, other instances in which documentation from the Office of the DOJAH/DORL is necessary include absences from class due to the vehicular accident (in which you were directly involved), appearances in court, employment issues, and personal or family-related issues. **Whether or not the absence is excused is at the instructor's discretion.**

Sport/Institutional Activities

All students must inform instructors of their participation in sports or institutional activities at the beginning of the semester. Students will need to provide the instructor with an official schedule of games and/or activities. For impromptu activities, the student's faculty advisor must provide a memo or send an email with the dates he/she missed class to the instructor within one week of the missed class.

Dress Code

Students will be denied admission to various functions if their manner of dress is inappropriate. Although a virtual classroom, students are expected to dress appropriately. Standard university practices (business attire) are expected for all presentations.

Examples of Inappropriate Dress and/or Appearance

1. Do-rags, stocking caps, skullcaps, and bandanas (prohibited at all times on the campus of Hampton University except in the privacy of the student's living quarters).
2. Head coverings and hoods for men in any building.
3. Baseball caps and hoods for women in any building. This policy item does not apply to headgear considered as a part of religious or cultural dress.

Procedures for Cultural or Religious Head Coverings

1. Students seeking approval to wear headgear as an expression of religious or cultural dress may make a written request for a review through the Office of the Chaplain.
2. The Chaplain will forward a recommendation to the Vice President for Student Affairs for final approval.
3. Students who are approved will then have their new ID card picture taken by University Police, with the headgear being worn.
4. All administrative, faculty, and support staff members will be expected to monitor student behavior applicable to this dress code and report any such disregard or violations to the Offices of the Dean of Men or Dean of Women for the attention of the Vice President for Student Affairs.

All administrative, faculty, and support staff members will be expected to monitor student behavior applicable to this dress code and report any such disregard or violations to the Offices of the Dean of Men or Dean of Women for the attention of the Vice President for Student Affairs.

Assessment Policies

Late Homework Policy

Homework/Lab assignments are due when indicated; absence is not a consideration for turning in work late or not completing assignments. If an absence is unavoidable, it is the responsibility of the student to obtain lecture notes and complete all assignments. **Late assignments will receive a 10% deduction for each day, including weekends, that they are late. ALL WORK must be completed within 5 days (including weekends) after the original due date; thereafter, a grade of 0 will be assigned.**

Assessment Taking Policy

Students will not be allowed to leave the classroom during an assessment of any kind; therefore, they will need to have CALCULATORS, sharpened pencils, Kleenex, and/or take care of personal issues before the assessment. If a student leaves the classroom, it MUST BE for an emergency. Otherwise, they will not be able to return to the class and continue the exam. If students have time, they should explain the situation to their instructor. If the students don't have time, they should explain when they return, and the instructor will determine whether to allow them to continue.

Make-Up Policy

Students **must provide an official excuse to make up a course examination/assignment due to absence within one week of their return.** The official excuse will be verified by DOJAH/DORL. Upon submitting an official excuse to the instructor, the student will receive an additional week to complete the missing exam/assignments. Any student not adhering to the above timeline will receive a zero as a grade for the exam/assignments. It is the responsibility of the student to meet with the instructor and provide the official excuse for their absence and complete all missing examinations/assignments within the stated timeline.

1. The student must see the instructor immediately upon returning to class.
2. Within a 1-week period after returning to class, students must bring in documentation.
3. After the documentation is received, students will sign the make-up assignments contract.
4. Students will have one week to make up the assignment(s).
 - a. The student will not be able to submit assignments to Canvas unless all documents are received and the contract is signed.
 - b. This policy is in effect for all in-class assignments, homework assignments, quizzes, and assessments missed during the period of absence.

For unexcused absences, students are encouraged to complete the in-class lab assignments in order to prepare for exams; however, the completed assignment cannot be submitted and/or will not be accepted for credit.

Academic Dishonesty Policy

Cheating

A student caught cheating on an examination or plagiarizing a paper, which forms a part of a course grade, shall be given an "F" in the course and will be subject to dismissal from the University. **There is ZERO tolerance for cheating, no second chances, and no partial credit.**

A student is considered to be cheating if, in the opinion of the person administering an examination (written or oral), the student gives, seeks, or receives aid during the process of the examination; the student buys, sells, steals, or otherwise possesses or transmits an examination without authorization;

or, the student substitutes for another or permits substitution for himself/ herself during an examination.

Cheating includes, but is not limited to:

1. Copying from others or allowing others to copy from the student during an examination
2. Sharing answers for a take-home assignment or examination without permission from the instructor
3. Using cell phones, Palm Pilots, or other electronic devices to communicate exam answers or store illegal notes
4. Using sign language, facial expressions, or other bodily noises to communicate exam answers
5. Using notes during an examination or assessment without permission from the instructor
6. Taking an examination for another student or allowing someone to take an exam for the registered student
7. Tampering with an assignment or exam after it has been corrected, then returning it for more credit without the consent or direction of the instructor.
8. Submitting an assignment done by someone else as a registered student's own work
9. Submitting portions of the same academic work for credit in more than one course without permission from instructors
10. Submitting work done in a previous semester by any student
11. Allowing someone else to do the research and writing of an assignment
12. Submitting a computer assignment where the student whose name appears on the assignment was not the person who did all the keystrokes or mouse commands to complete the assignment

All cases of cheating shall be reported by the instructor to the chair of the department in which the cheating occurred, to the school dean/division director, and to the Provost.

Gen-AI Usage

Generative Artificial Intelligence (GenAI) tools include but are not limited to ChatGPT, Bard, Gemini, Claude, AlphaCode, Perplexity, Quillbot, and Copilot. This course values original thought and critical engagement. While AI may support learning, it cannot replace students' intellectual effort. Students are responsible for all submitted content, including any errors, bias, or misuse of GenAI tools. Misuse, even unintentional, will not be excused.

Prohibited Use: Unless explicitly allowed, GenAI tools may not be used to:

1. Complete exams, tests, or quizzes (multiple choice, essay, short answer, etc.)
2. Write graded discussions, essays, journals, or reflections
3. Paraphrase or summarize assigned readings or instructor-created material
4. Write complete program codes for assignments

Permitted Use with Disclosure: When allowed, students must:

1. Cite the tool and explain how it was used
 2. Quote and attribute direct AI-generated text
 3. Include in-text citations for paraphrased content
 4. Cite AI-generated media (images, charts, code, etc.)
 5. Add a "Sourced Tools" section at the end of the submission, listing the tools and their contributions.
- Violations will be considered cheating and will be dealt with according to the Academic Dishonesty Policy. If students are unsure about GenAI use on an assignment, consult the instructor first. Instructor permission overrides this policy for specific assignments, but any misuse (e.g., generating full work when

only brainstorming is allowed) will be treated as a violation.

Plagiarism

Plagiarism is defined as “taking and using as one’s own writing or ideas of another.” All materials used to meet the assigned written requirements of a course, from any source, must be given proper credit by citing the source. A student caught plagiarizing a paper, which forms a part of a course grade, shall be given an “F” in the course and will be subject to dismissal from the University.

Penalties for Academic Dishonesty

Cases of academic dishonesty are initially investigated and reported by members of the instructional faculty to the chairperson of the department in which the cheating occurred, to the school dean, division director, and to the Office of the Chancellor and Provost.

No penalty shall be imposed until the student has been informed of the charge and of the evidence upon which it is based and has been allowed to present his/her defense. If the faculty member and the student cannot agree on the facts on the charge, or if the student wishes to appeal a penalty, the issue may be taken to the department chair. Each party will present his/her case to the chair, who shall then call a meeting of all involved parties. If the issue is not resolved at the departmental level, the dean shall conduct a hearing. If the issue is not resolved at the school level, either party may appeal the decision at the school level to the Provost, who shall convene the appropriate individuals and conduct a hearing in order to resolve the issue.

Penalties for minor violations of academic dishonesty are to be recommended at the discretion of the instructor. **Therefore, the recommended penalty for cheating of any kind will be an “F” for the course.**

When dismissal from the University is the recommended penalty, the chairman of the department submits the details of the case to the Office of the Chancellor and Provost, who schedules a hearing.

Administrative Action

The Provost has the authority to dismiss or expel any student who fails to meet scholarship requirements or to abide by academic regulations.

Code of Conduct

Joining the Hampton Family is an honor and requires each individual to uphold the policies, regulations, and guidelines established for students, faculty, administration, professional and other employees, and the laws of the Commonwealth of Virginia. Members of the Hampton Family embrace the core values of Exceptional Character: Respect, Professionalism, Integrity, and Community. No member shall lie, cheat, or steal, and each member is required to adhere to and conform to the instructions and guidance of the leadership of his/her respective area. Therefore, in maintaining The Standard of Excellence, the following are expected of each member of the Hampton Family:

Respect:

1. To respect himself or herself.

Each member of the Hampton Family will exhibit a high degree of maturity and self-respect and foster an appreciation for other cultures, one’s own cultural background, as well as the cultural heritage from

which Hampton University was born. It is only through these appreciations that the future of our university can be sustained indefinitely.

2. To respect the dignity, feelings, worth, and values of others.

Each member of the Hampton Family will respect one another and visitors as if they were guests in one's home. Students, faculty, and staff should engage in behaviors that are uplifting and encouraging. Moreover, to accost, bully, cajole, or proselytize students, faculty, or staff, parents, or others, use vile, obscene, or abusive language or exhibit lewd behavior, is in direct violation of the Hampton University Code, on or off campus.

Professionalism:

3. To foster a personal professional work ethic within the Hampton University Family.

Every member of the Hampton Family must strive for efficiency and job perfection. Each individual must exhibit a commitment to serve, and tasks must be executed humanely and civilly.

4. To foster an open, fair, and caring environment.

The University will maintain an open and caring environment. It is understood that intellectual stimulation is nurtured through the sharing of ideas. In cases where issues arise, each member of the Hampton Family is assured equal and fair treatment.

Integrity:

5. To respect the rights and property of others.

Each member of the Hampton Family will only engage in activities that are legal and ethical, both on and off campus. No member shall lie, cheat, or steal. Other transgressions include, but are not limited to, harassment of any form, possession of weapons such as knives and firearms, involvement in possession, use, distribution, and sale of illegal drugs, theft, vandalism, or hazing. Violators will be subject to all applicable provisions listed in the Faculty Handbook, Educational Support Staff Personnel Policies, Benefits & Procedures Handbook, the Official Student Handbook, the Hampton University Code, and statutes of the Commonwealth of Virginia.

6. To practice personal, professional, and academic integrity

Personal, professional, and academic integrity is paramount to the survival and potential of the Hampton Family. Therefore, individuals found in violation of Hampton University's policies against lying, cheating, plagiarism, or stealing are subject to disciplinary action that could possibly include dismissal from the University.

Community:

7. To promote inclusion, while striving to learn from differences in people, ideas, and opinions.

Each member of the Hampton Family will support equal rights and opportunities for all, regardless of age, sex, race, sexual orientation, religion, disability, ethnic heritage, socio-economic status, political, social, or other affiliation or disaffiliation.

8. To promote the ethical use of technology and social media

As a Hampton Family, we embrace the digital age. Each member of the Hampton Family is expected to use technology responsibly and respectfully. Individuals should utilize their best judgment before posting content and should specifically refrain from cyberbullying or using social media to cheat. Uses of technology or social media posts that violate any of the aforementioned tenets of this Code will be subject to disciplinary action.

9. To be fully responsible for upholding the Hampton University Code.

Each member of the Hampton Family will embrace all tenets of the Code of Conduct, Policies, and the Honor Pledge and is encouraged to report all violators to the appropriate administrator or the Council for Institutional Culture and Values.

Approved by Administrative Council, July 31, 2018

University Policy on Title IX

Faculty/Staff Reporting Responsibility

All alleged discrimination, sexual misconduct, or harassment in violation of Title IX identified by Hampton University employees must be reported to the Title IX Coordinator. (University confidentiality personnel include the Student Health Center, University Chaplain, and the Counseling Center.)

Wellness Statement in the School of Science

The School of Science emphasizes the promotion of five key aspects of wellness: social connectedness, exercise, nutrition, sleep, and mindfulness, recognizing their significant impact on both physical and mental health. By adopting simple and health-conscious choices in daily life, individuals can mitigate stress, foster positive social interactions, and achieve academic success.

SELF-CARE: Students are strongly encouraged to regularly assess their personal well-being, ensuring that basic needs are consistently met. It is advisable to proactively plan for self-care to prevent reaching an overwhelming level of stress. Should students find themselves struggling to manage the demands of college life, reaching out to professors is recommended.

Additionally, students are urged to utilize campus resources, including:

1. Student Counseling Center

Email: studentcounseling@hamptonu.edu

Phone: (757) 727-5617

After-hour emergencies: (757) 727-5666

2. Student Health Center

Phone: (757) 727-5315

After-hour emergencies: (757) 727-5259

3. Therapy Assistance Online (TAO)

Phone: (757) 727-5617
